Design Spreadsheet

Here you will design a spreadsheet for uploading videos and entering information about their content. You will need to select the categories and the fields within each category that apply to your study. Please select all the categories and fields that you know about, even if the information is constant across the entire dataset or true of every participant or session. This makes your dataset more valuable and enhances its potential for reuse.

Overview — Edit title, description, and citation

Manage Access — Manage collaborators on this volume and share with authorized Databrary researchers when you're ready

Get Help with Upload — Get help here with preparing your data and files for sharing

Design Spreadsheet — Describe the components of your study

Enter Data — Enter study data, create and label sessions, and upload videos and other materials

Add Links — Add links to additional citations and external resources

List Funding — Specify funding sources

Categories

Click the checkbox to add that category to your spreadsheet. To preview available fields for that category, click on the category definition.

- [x] **participant**: An individual human subject whose data are used or represented
  Selected fields: ID, birthdate, gender, race, ethnicity, disability, language
- [x] **pilot**: Indicates that the methods used were not finalized or were non-standard
  Selected fields: pilot
- [x] **exclusion**: Indicates that data were not usable
  Selected fields: reason
- [ ] **condition**: An experimenter-determined manipulation (within or between sessions)
- [x] **group**: A grouping determined by an aspect of the data (participant ability, age, grade level, experience, longitudinal visit, measurements used/available)
  Selected fields: name
- [ ] **task**: A particular task, activity, or phase of the session or study
- [x] **context**: A particular setting or other aspect of where/when/how data were collected
  Selected fields: setting, country, state

participant Pre-define options

- [x] **ID**: A unique, anonymized, primary identifier, such as participant ID
- [ ] **info**: Other information or alternate identifier
- [ ] **description**: A longer explanation or description
- [x] **birthdate**: Date of birth (used with session date to calculate age; you can also use the group category to designate age groups)
- [x] **gender**: "Male", "Female", or any other relevant gender
- [x] **race**: As classified by NIH, or user-defined classification
- [x] **ethnicity**: As classified by NIH (Hispanic/Non-Hispanic), or user-defined classification
- [ ] **gestational age**: Pregnancy age in weeks between last menstrual period and birth (or pre-natal observation)
- [ ] **pregnancy term**: "Full term", "Preterm", or other gestational term
- [x] **disability**: Any developmental, physical, or mental disability or disabilities (assumed "typical" by default)
- [x] **language**: Primary language(s) spoken by and to participant (assumed "English" by default)
- [ ] **country**: Country where participant was born (assumed "US" by default)
- [ ] **state**: State/territory where participant was born
- [ ] **setting**: The physical context of the participant (please do not use for new data: see the context category instead)

Manage volume

ET Freeplay — Volume history

Your volume is 46% complete

Enter Data

Here you can upload videos and other materials for each session. You can also enter data about individual sessions, participants, or data collections. Each row in this spreadsheet represents a single session. Note that you can label each session with any number of items from each category, including none, and can also assign these labels to specific parts of each session or upload files using the timeline. Use the Design tab to edit columns in the spreadsheet.

See our list of accepted file types.

You are in *context view*. Here you can manage the list of labels in this category. Return to the folder view to edit session data.
