Design

First choose the various **categories** or groupings by which you wish to label and organize your data. Then choose the **fields** within each category you wish to record, each of which will be a column of your data spreadsheet.

In the next tab, you can create items within each category (such as an individual participant or task) by *choosing view* in the upper-left corner of the spreadsheet. Note that you can label each session with any number of items from each category, or nothing at all, and can also assign these labels to specific parts of each session using the timeline.

☒ Participant

Explanation explanation explanation explanation.....

☐ ID: A primary, unique anonymized identifier, label, or name

☐ birthdate: The date of birth of an individual... (used with session date to calculate age)

☐ gender: "Male", "Female", or any other relevant gender label

☐ race: Usually as categorized by NIH

☐ ethnicity: Usually as categorized by NIH (Hispanic/ Non-Hispanic)

☐ disability: Any developmental, physical, or mental disability (assumed "typical" by default)

☐ language: Primary language relevant to this label, spoken by this participant

>> Expand to show all field options <<

☐ Condition

Explanation explanation explanation explanation.....

☐ Task

Explanation explanation explanation explanation.....

☐ Group

Explanation explanation explanation explanation.....

☒ Context

Explanation explanation explanation explanation.....

☐ ID: A primary, unique anonymized identifier, label, or name

☐ reason: A reason for the label (often for an exclusion)

☐ summary: A short, one-line summary of this label

☐ description: A longer explanation or description of this label

☐ birthdate: The date of birth of an individual (used with session date to calculate age).

☐ gender: "Male", "Female", or any other relevant gender label

☐ race: Usually as categorized by NIH

☐ ethnicity: Usually as categorized by NIH (Hispanic/ Non-Hispanic)

☐ disability: Any developmental, physical, or mental disability (assumed "typical" by default).

☐ language: Primary language relevant to this label, spoken by this participant

☐ setting: The physical context of this label

☐ country: Relevant country of origin, setting, or otherwise (assumed "US" by default)

☐ state: Relevant state/ territory, usually within specified country

☐ info: Other information or alternate identifier for this label

☐ gestational age (weeks)

After selection by clicking on the checkbox, section expands to show all of that category's field options

All OTHER categories minimize to show only the selected field options [SEE PARTICIPANT for example]

release level of each field option if none, the participant's release level is used for that field. Solution not ideal yet, wip.

## Option 2

Categories list flows with page.
