FULL NAME

EMAIL

AFFILIATION

We have already decided on Full Name as opposed to First and Last name?

Should we be confirming e-mail address (so people don't get it wrong) - maybe this has already been decided on as well.

Tooltip provides more information, but maybe expand it placeholder text to 'Name of University or Institution'

Read each section of the agreement. You can also download the [full agreement as pdf](#).

As a member of the Databrary community, you promise to:

1. Treat Databrary data with the same high standard of care that you treat data collected in your own laboratory.
2. Respect participants' wishes about sharing their data just as you do in your lab.
3. Take care in authorizing other people (affiliates and collaborators) and take responsibility for their conduct and use of Databrary data, just as you do in your own lab.

☐ I have read and understand the [Databrary Access Agreement](#)

Agree and register

This is a little confusing and I wonder if we should add two buttons here instead of these two links.
See below.

The documents have places for 'initial here' and such. Should we add language here to say you only have to agree by checking here?

Set Password

Please set a secure password. Remember that users may not share their login information with anyone.

Your Databrary password is used to protect many sensitive resources, including human subjects data, and to control your own stored research data. Therefore, we require that passwords meet a minimum threshold. To choose a secure password, please:

- do not use the same password you use for other websites or computers;
- do not base your password on a single word, even with minimal substitution;
- do not use repeated characters or simple sequences (like "abc" or "&*()");
- use a password with multiple words or a variety of characters;
- use a password that is at least 7 characters long.

Tips for exploring Databrary.

Request Authorization

In order to access Databrary resources, you must be authorized either as an Authorized Investigator through a sponsoring institution, or by an authorized Databrary Investigator as an Affiliate. [Read more](#) about the authorization process and its requirements.

- ☐ **Authorized Investigator** (Researchers that are eligible to conduct independent research at their institution may become Authorized Investigators and authorize and manage Affiliates.)
- ☒ **Affiliate Investigator** (Individuals working with Authorized Investigators may be authorized as Affiliates.)

Search for your sponsoring PI or institution...

Would it make sense to split the text input box into two such that they would appear below the option they are related to?

Maybe this is corny, but maybe rephrase these as “I am an Authorized | Affiliate Investigator...”?

Submit Authorization

[auth.request.notfound.title]

If you cannot find the Principal Investigator or Institution that you are looking for, please complete one of the following steps.

- If you're seeking affiliate status from an investigator, please contact him/her directly and suggest creating an account at Databrary. Once an account is created, you can apply for a sponsor.
- Otherwise, please list the name and contact information (email, phone number) for your Institution's Authorizing Official that will co-sign your Agreement. This will help us to get you Authorized as quickly as possible.

Do we ever have issues with people just waiting for long periods of time without any response? Can we provide any way for them to ping the requestee? (although that sounds like a bad idea).

Possible to use the new buttons from the front page? Liven this space up a bit?
